OBJECTIVE

I am a motivated web developer with experience in JavaScript and React. Seeking roles of Frontend Developer or Full Stack Developer. I am eager to contribute to innovative projects and advance my career in a dynamic environment.

EXPERIENCE

Junior Front End Web Developer | Accenture

2022 – 2023

During my internship, I contributed to the development of a web application for a client using React and TypeScript. This experience strengthened my ability to learn independently and make active contributions to the product's development. I collaborated daily with designers and senior developers, gaining valuable insight into professional workflows and best practices.

Skills: HTML, CSS, React, APIs, Tailwind, Styled Components, git, debugging, teamwork, AGILE.

Junior Full Stack Developer | Develhope

2022 – 2022

This course aimed to simulate the IT work environment while forming Junior Full Stack profiles. Therefore, I not only learned the basics of Full Stack Development in React to be ready for the job market. Develhope placed a special focus on soft skills, preparing me for everyday interactions in academic or work environments.

Skills: HTML, CSS, React, Node.js, Express, APIs, Tailwind, JavaScript, Typescript, Sass/scss, git/github, teamwork, professional workflow.

EDUCATION

Junior .NET Developer | Generation Italy

2024 – 2025

During this 3-month course, I had the chance to learn the job-ready set of skills to be a Microsoft Junior Developer. Generation valued soft skills to enhance our capabilities of positive confrontations and professional workflows.

Skills: C#, ASP.NET, MVC, SQL, MSSQL.

High school leaving qualification in classical studies | Liceo Classico Siotto Pintor

2021

The deep study of Ancient Greek and Latin languages, cultures, and literatures allowed me to expand my point of view at a very young age. Critical thinking, problem solving, debate, positive dialogue between pairs, research; these are only a few of the skills I gained during High School.

SKILLS

- Web development
- Microsoft 365
- SQL Databases

- Communication skills
- Problem solving
- Teamwork

- ITALIAN level: Mother tongue
- ENGLISH level: C1

PERSONAL PROJECTS

As a portfolio, I have an ongoing long-term personal project, made with Next.js, TypeScript, Prisma.js, and PostgreSQL. I am styling it with Hero UI components as a starting base, so I can upgrade to shared UI later. I strongly believe this solution allows me to express my creativity, curiosity, personality, and abilities. As of now, it is still not deployed online, and its repo is private. Can give access or give a demo at request.
